INSIDE You’ll Experience The Thrill of Growing $10,000 to $452,975 In Less than Two Years Including Commissions

Past performance is not necessarily indicative of future results. See risk disclosure on page 2.
No representation is being made that you will achieve profits or the same or similar results as any person providing a testimonial. No representation is being made that the person providing the testimonial is likely to continue to experience profitable trading after the date on which the testimonial is provided, and the person providing the testimonial may have subsequently sustained losses.

Auto-trading, or any broker or advisor-directed type of trading, is not supported or endorsed by Russell Sands. For additional information, you may visit the SEC's website: All About Auto-Trading, https://www.sec.gov/reportspubs/investor-publications/investorpubsautotradinghtm.html.

Russell Sands does not recommend or refer subscribers to broker-dealers. You should perform your own due diligence with respect to satisfactory broker-dealers and whether to open a brokerage account. You should always consult with your own professional advisers regarding equities and options on equities trading. The information provided by the newsletters, trading, training and educational products related to various markets (collectively referred to as the "Services") is not customized or personalized to any particular risk profile or tolerance. Nor is the information published by Russell Sands a customized or personalized recommendation to buy, sell, hold, or invest in particular financial products, and the information and/or recommendation is intended to supplement your own research and analysis. Russell Sands's Services are not a solicitation or offer to buy or sell any financial products, and the Services are not intended to provide money management advice or services.

Past performance is not necessarily indicative of future results. Trading and investing involve substantial risk. Trading on margin carries a high level of risk, and may not be suitable for all investors. Other than the refund policy detailed elsewhere, Russell Sands does not make any guarantee or other promise as to any results that may be obtained from using the Services. No person subscribing for the Services ("Subscriber") should make any investment decision without first consulting his or her own personal financial adviser, broker or consultant. Russell Sands disclaims any and all liability in the event anything contained in the Services proves to be inaccurate, incomplete or unreliable, or results in any investment or other loss by a Subscriber. You should trade or invest only "risk capital" - money you can afford to lose. Trading stocks and stock options involves high risk and you can lose the entire principal amount invested or more. All investments carry risk and all trading decisions remain the responsibility of the person making the decision. There is no guarantee that systems, indicators or trading signals will result in profits or that they will not produce losses. Subscribers should fully understand all risks associated with any kind of trading or investing before engaging in such activities.

Some profit examples are based on hypothetical or simulated trading. This means the trades are not actual trades and instead are hypothetical trades based on real market prices at the time the recommendation is disseminated. No actual money is invested, nor are any trades executed. Hypothetical or simulated performance is not necessarily indicative of future results. Hypothetical performance results have many inherent limitations, some of which are described below. Also, the hypothetical results do not include the costs of subscriptions, commissions, or other fees. Because the trades underlying these examples have not actually been executed, the results may understate or overstate the impact of certain market factors, such as lack of liquidity. Simulated trading services in general are also designed with the benefit of hindsight, which may not be relevant to actual trading. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading. Russell Sands makes no representations or warranties that any account will or is likely to achieve profits similar to those shown.

Testimonials are believed to be true based on the representations of the persons providing the testimonials, but facts stated in testimonials have not been independently audited or verified. Nor has there been any attempt to determine the experiences of the persons giving the testimonials after the testimonials were given. The average reader should not necessarily expect the same or similar results. Options involve risk and are not suitable for all investors. Past performance does not guarantee future results.

Russell Sands’s experiences are not typical. Russell Sands is an experienced investor and your results will vary depending on risk tolerance, amount of risk capital utilized, size of trading position and other factors. Certain Subscribers may modify Russell Sands’s methods, or modify or ignore the rules or risk parameters, and any such actions are taken entirely at the Subscriber’s election and for the Subscriber’s own risk.
Now the Amazing NEW Turtle Trading Secrets Can Make YOU Rich Too!

► The ‘order-runner’ who discovered the Turtle Trading Secrets borrowed $1,600, bought a seat on the exchange for $1,200, and grew the remaining $400 to more than $200 Million in actual trading profits . . .

► Five of the World’s Top Money Managers, relying on the Turtle Trading Secrets, have generated an average annual profit of $100+ Million for over 10 Years . . .

► According to an article in the Wall Street Journal, a 19-year-old student retired happy after the Turtle Trading Secrets made him “about $31.5 million in profits”.

Amazing millionaire-making stories about the Turtle Trading Secrets have appeared in the Wall Street Journal, New York Times, Barron’s, Jack Schwager’s Market Wizards, and countless other publications for more than three decades.

What’s NEW is this . . . The Turtle Trading Secret is NOT just for commodity futures anymore!

For a number of reasons, some folks shy away from the futures market. And, until recently the Turtle Trading System didn’t work with stocks. It didn’t even work well with stock indexes.

On the other hand, it works fantastic on the growing number of ETFs that specialize in energies, precious metals, interest rates, retail, currencies, so on and so forth.

Best of all, I developed a quick & easy technique . . . you’ll learn about in this report . . .

Whereby you can trade options on those ETFs in your regular stock trading account . . .

And enjoy soaring profits similar to trading futures . . . safer and essentially stress-free.

So, if you’d like to potentially grow a portion of your IRA to an average of 311% per year, read on.
“On a whim, we created Turtle-Ops to see how profitable trading options on ETFs could be . . . Who knew it would come to this?!!!”

Dear Friend,

Have you ever done something on a whim . . .

And suddenly, what you did on impulse changed your life forever?

I have. And it’s happening again . . .

Except this time it’s happening to you too!

My name’s Russell Sands. And back in 1983 . . . on a whim . . . I responded to a weird classified ad in the NY Times.

You can read the whole story on page 6. But, suffice it to say . . .

Answering that ad led to 2 incredible weeks of instruction . . . followed by millions of dollars in trading profits . . .

And my life was forever changed . . .

Well, this is another one of those amazing life-changing times.

Here We Go Again . . . Only This Time, On a Much Grander Scale!

The Turtle-Ops project started with just three guys having a beer. I’ll tell you all about it in a minute.

But “Operation Turtle-Ops Profit Power” quickly took on a life of its own . . .

Becoming the next chapter of the greatest trading story ever told . . .

Except, on a much grander scale.
I was one of only 23 people entrusted with the original Turtle secret . . . 14 in my group and 9 joined a year later . . . And we were all sworn to secrecy.

Turtle-Ops Profit Power, on the other hand . . . puts immediate options profits within easy reach of traders everywhere!

Who Ever Dreamed YOU Could Experience This Kind of Instant Success?

“Safe and effective are words you don’t always associate with trading systems, but my Turtle accounts have been just that . . . In nine months, a $5,000 investment has turned into a $22,000 balance.” –Mike T.

“I started the Turtle program in April with $42,000 . . . as of Nov 5th the account is $109,000 . . . more than 150% gain in 6 months” –Mel D.

“I started in late March with a $20,000 account and as of this writing my equity is at $50,830.36.” –Larry P.

“This has been my absolute BEST ever trading year, thanks to your system. I have been trading for over 18 years. This is the most consistently winning technique I have used. In 5 months. I am up well over a 100%.” –Chas B.

I could go on and on. But, I think you get the idea . . .

Regardless of your skill level, this is your chance to make loads of money starting the very first day.

But, even more important . . .
In 1983, a legendary futures trader by the name of Richard Dennis... famous for growing $400 to $200,000,000... bet his associate, Bill Eckhardt, that he could "grow great traders just like they grow turtles in Singapore."

More than 2,000 resumes poured in... Approximately 80 applicants were invited to come in for an interview... And a total of 23 individuals were ultimately selected: a school teacher, a salesman, a blackjack player, and a variety of other people with no trading experience.

For the first few days the group met in a classroom where they learned basic chart-reading and simple money management concepts.

After a week or so, the instructor walked into class and announced that $1,000,000 had been put into a trading account for each 'Turtle'... as the students were nick-named.

"Now, let's go make some money," he said. And they did!

From 1984 to 1989, despite the '87 crash, these homegrown traders made over $175 million in profits for Dennis and another $35 million for themselves!

And the Profits Keep Piling Up!

In case you consider this old news... And you think the same system used more than 30 years ago may not work as well today, get this...

Eight of the original Turtles are still registered C.T.A.s managing public money... and in just 5 years they've earned profits totaling more than $1.4 Billion... that's Billion with a "B"!

All these ordinary people have made BILLIONS of dollars year after year... and you're going to learn their exact strategy in precise detail...

Better still, the Turtle-Ops enhancement to the original Turtle Strategy will empower you to earn similar returns in your IRA or stock account when you trade options on Sector ETFs!

Join us today for what promises to be a truly epic opportunity of a lifetime!

Call Now: 888-233-1431
Turtle-Ops Profit Power Can Secure Your Financial Future With a Modest Trading Account

Maybe even more important than exponential growth starting the very first day... which you’ll learn more about on page 13...

Is the fact that Turtle-Ops has shown consistent earning power year after year.

And that means you could carve out a small portion of your IRA... let’s say $5,000... grow it to $50,000 in as little as 6 months... as you can see for yourself on page 11.

And potentially live happily-ever-after without a care in the world!

But, if $5,000 is still too rich for your blood... No worries!

Theoretically, you could invest as little as $200 and eventually end up with the same sense of security... it just takes longer.

But, before we get into details on how little money you need to start... how little time it takes to do... and how fast your account is likely to grow...

Let me tell you how Turtle-Ops Profit Power came to be in the first place.

A Commodity Futures Trader, An Options Trader, and a Forex Trader Walk into a Bar...

Does this sound like a joke to you?

I’ll admit it’s a pretty amusing story. But I swear it’s no joke.

I’m a professional futures trader. That’s how I’ve made my living for more than 30 years... ever since Richard Dennis taught me the Turtle Secrets.

Russell Sands’ experiences are not typical. Russell Sands is an experienced investor and your results will vary depending on risk tolerance, amount of risk capital utilized, size of trading position and other factors. Certain Subscribers may modify Russell Sands’ methods, or modify or ignore the rules or risk parameters, and any such actions are taken entirely at the Subscriber’s own election and for the Subscriber’s own risk. Please see hypothetical results disclaimer on page 2.
And like all the original Turtles . . . or at least 20 out of 23 of us . . . I’ve made millions of dollars doing it.

So why would I do anything else?

Conversely, my buddy Doug made his fortune buying and selling options. And he’s one of the richest guys I know.

Then there’s Norm. Norm trades currencies in the Forex market. And judging by the way he spends money, he’s got a lot of it.

Now picture this: You’ve got three guys who trade for a living . . . and who’ve made millions of dollars doing it . . .

And we’re sitting in the tasting room of a new microbrewery that friends of ours just opened . . . sampling all their various Belgian-style craft beers.

When Norm starts grousing about his Forex broker closing up shop in the US . . .

“Why not just trade currencies in the futures market?” I ask.

Norm shrugs, grunts, and takes another sip of his beer.

Then Doug pipes up with “If it were me, I’d trade options on currency ETFs . . . Sector ETFs is where the smart money is these days.”

I didn’t know much about ETFs . . . just that it stands for Exchange Traded Funds . . . But Doug’s a very smart guy . . . and he’s made boatloads of money. So he had my attention.

And it surprised me how much Sector ETFs have in common with commodity futures . . .

Sector ETFs and The Futures Market Have a Lot In Common

Unlike the first ETFs, which tracked broad market indexes, (i.e. S&P 500) . . . Sector ETFs give you the power to outperform the market 100 times over by trading only the hottest sectors . . . much like trading commodity futures.

Past performance is not necessarily indicative of future results. See risk disclosure on page 2.
And if you want the benefit of superb profit-boosting leverage, like the original Turtles got trading futures . . .

You simply trade options on those high-flying ETFs.

For example, when the S&P 500 was bouncing around . . . going nowhere . . . giving traders heartburn . . .

The 20+Yr Treasury Bond ETF rose 6% in just 15 trading days . . . pretty good compared to heartburn.

However, 6% is nothing compared to our Turtle-Ops profit of 327% pictured to the right!!!

Pretty exciting, huh?
But, I’m getting ahead of myself.
So now back to my story . . .
Norm heard trading options was complicated and said he wanted no part of anything that was too hard or took too much time.
Truth be told, Norm’s always been kind of lazy.
But Doug set him straight right away . . .

**Did You Know Making Money Could Be This EASY To Do?**

Buying Call options when the market is heading higher . . .

And buying Put options when price is in a freefall . . .

Is not only the most profitable way to trade options . . . It’s also super simple!
Complex hedging strategies . . . like Straddles, Strangles, Butterflies and Condors . . .
Are for people who have no clue where the market is headed.
But, that certainly is NOT who the Turtles are!

Turtle-Ops Profit Power . . . built on the original Turtle Trading Secrets . . .

Testimonials are believed to be true based on the representations of the persons providing the testimonials, but facts stated in testimonials have not been independently audited or verified. Nor has there been any attempt to determine the experiences of the persons giving the testimonials after the testimonials were given. The average reader should not necessarily expect the same or similar results. Options involve risk and are not suitable for all investors. Past performance does not guarantee future results.
Is like jumping onto a runaway train . . . And there’s no mistaking where that train is headed!

If it’s headed NORTH, you buy Call Options.

If it’s headed SOUTH, you buy Put Options.

What could be easier?

And if you’re lazy, like Norm . . . Or if you’re simply busy doing other things . . .

No worries . . .

Every evening I’ll send you a list of ETFs to check in the morning.

Spend 2 or 3 minutes seeing if a “money train” has actually left the station . . .

And, if so, place your trade according to a few simple Turtle-Ops rules . . .

You can even add a Trailing Stop and a Profit Target, if you’d like.

After that, let the profits come to you automatically . . . while you spend your day anyway you like!

The obscene amount of money even a beginner can easily make is so exciting . . . I keep jumping ahead.

But, you deserve to know the whole story. So, let me get back to it.

Customer Survey Results

In a recent customer survey, we found that nearly three out of four customers that traded with our publication made money. Only 4% said they did not learn anything new and useful.

See full survey results at www.tradewins.com/survey
The More We Came to Realize The Obscene Amount of Money Even a Beginner Could Make The More Excited We Got!

The original Turtle Trading Strategy has been time-tested for over thirty years; under every conceivable market condition . . . wars, inflation, market crashes, natural disasters, and maybe worst of all . . . extreme boredom.

And it continues to churn out millions and millions of dollars every year.

BUT . . . Because margins can be rather high in the futures market . . .

Trading futures requires a fair amount of money.

Richard Dennis gave each of us Turtles $1,000,000 to trade with.

Then, even though you can learn the basic Turtle Secrets in less than an hour, he stayed by our side for two full weeks . . . to help us build confidence.

But, what about you?

I’m guessing no one gave you a bunch of money to play with.

So you’ll be happy to know . . . with options you don’t need much money!

Using Turtle-Ops rules to trade options on ETFs, your investment is minimal and your risk is strictly limited.

In fact, you could theoretically start with as little as $200 . . .

But, since Turtle-Ops employs diversification and money-management, similar to what Richard Dennis taught us Turtles . . .

It’s better to start with a few thousand if you can swing it.

Then let Turtle-Ops Profit Power help you build YOUR fortune.

Turtle-Ops Profit Power Grows $5K to $53,862 In Just 6 Months!

Enjoy Smooth, Steady Growth with NO Crippling Drawdowns!

Stock diversity is automatically built into every ETF . . . And you get overall market diversification trading ETFs from a variety of sectors . . .

So, if you invest 5% of your account into each trade... adjusting the number of options depending on price . . . You can expect smooth steady growth with no crippling drawdowns. How great is that!

Russell Sands’ experiences are not typical. Russell Sands is an experienced investor and your results will vary depending on risk tolerance, amount of risk capital utilized, size of trading position and other factors. Certain Subscribers may modify Russell Sands’ methods, or modify or ignore the rules or risk parameters, and any such actions are taken entirely at the Subscriber’s own election and for the Subscriber’s own risk. Please see hypothetical results disclaimer on page 2.
What’s So Great About Sector ETFs?

Exchange Traded Funds (ETFs) are exploding in popularity... reaching more than $5-Trillion in assets worldwide . . .

And attracting over $300-Billion new dollars in this past year alone.

Why? Because ETFs give you the benefit of diversification with the convenience of trading individual stocks and options.

And, with diversification comes greater safety.

Not only can unexpected events blindside investors who own individual stocks . . . earnings announcements, which occur every 90 days, often cause treacherous, performance-crushing volatility . . . for no apparent reason. Even when a company is meeting their targets, comments from management can put the stock’s price into a tailspin. But, ETFs eliminate this problem entirely.

On the other hand, broad index ETFs . . . i.e. SPDR S&P 500 (SPY) are too diversified . . . cancelling out their high-flyers with their losers.

In 3 months’ time the S&P 500 . . . comprised of stocks from every sector . . . gained 2.2%.

Whereas Turtle-Ops Profit Power bought Call options in the hottest sectors at the time . . . i.e. Utilities (XLU)

And bought Puts in the plunging sectors . . . i.e. Healthcare (XLV)

Perpetuating overall growth of 48.67% in the same 3 month period!

Without doubt, Sector ETFs provide the greatest wealth-building environment on the planet . . .

And the Turtle Secret is the most respected trading system of all time . . .

No wonder Turtle-Ops Profit Power performance is off the charts!

Join us today for what promises to be a truly epic opportunity of a lifetime!

Call Now: 888-233-1431
Imagine if you scraped together $5k . . .
And, using my nightly forecast as your guide . . .
You grew your $5k to more than $50,000 in just 6 months!
Seeing how fast $5k can potentially grow to $53,862 . . .
And, remembering how $50k could produce an average monthly income of $14,328 . . . which you saw on page 7 . . .
I think you’ll agree it would have been a crying shame if we’d given up on Turtle-Ops Profit Power the minute we hit a snag . . .
Because actually, we did hit a pretty big snag.
Here’s what happened . . .

OH NO!!! Turtle-Ops Profit Power Suddenly Hit A Snag!

“That’ll never work for options,” Doug said when I explained the original Turtle exit strategy.

“Why the heck not?!!!”
Judging by the turned heads, Norm and I must have reacted more heatedly than intended . . .
But who could blame us?
At this point we felt absolutely, 100% sure Turtle-Ops Profit Power . . . as we’d taken to calling it . . . Turtle-Ops for short . . . was destined to become a wealth-building super-power second to none . . . especially for the little guy!
Consider all the benefits:

Russell Sands’ experiences are not typical. Russell Sands is an experienced investor and your results will vary depending on risk tolerance, amount of risk capital utilized, size of trading position and other factors. Certain Subscribers may modify Russell Sands’ methods, or modify or ignore the rules or risk parameters, and any such actions are taken entirely at the Subscriber’s own election and for the Subscriber’s own risk. Please see hypothetical results disclaimer on page 2.
✔ Risk limited to as little as $200
✔ Awesome profit-boosting leverage
✔ Diversified for smoother growth
✔ Profit in both bull and bear markets
✔ Trade the same way as stocks
✔ Can be used to grow your IRA
✔ Spend just a few minutes a day

So darn simple, a beginner can learn it in less than an hour!

Being professional traders, Norm and I know what works and what doesn’t when it comes to finding exceptional profit opportunities.

But, neither of us had any experience with trading options.

Doug, on the other hand, knows everything there is to know about trading options.

So we asked him if we could fix it.

“Sure, we can fix it. But, it’s going to take some testing,” he said.

Check Please . . . Operation Turtle-Ops Profit Power Is Officially Underway!

Doug’s home office has more computers, software, and market data than the CBOE. And he’s an absolute genius when it comes to testing trading systems.

So, we paid the check and headed over to Doug’s house . . . We couldn’t wait to get operation Turtle-Ops underway!

The solid green line in the chart above is the original Turtle ‘Line in the Sand’ for entering a trade.

The essence of that line is a closely guarded Turtle Secret. And crossing that line also signals entry into a Turtle-Ops trade.

The dotted line is the original Turtle ‘Line in the Sand’ for exiting a trade.

Turtle-Ops EXIT

$8,481 Profit

www.turtle-ops.com · Call Today Toll-Free 1-888-233-1431
Waiting for the original Turtle exit signal should work just as well for Sector ETFs as it works for futures.

But if you want to enjoy the profit boosting power of options . . . which is what Turtle-Ops Profit Power is all about . . .

You need an exit strategy that gets you out sooner . . . but not too soon.

And that’s what we were determined to find.

**Finding the Ultimate Exit Strategy**

**For Turtle-Ops Profit Power Was Definitely Worth the Effort!**

Options have an expiration date, after which they’re worthless. So the passing of time erodes the value of an option a little each day.

Doug showed us a number of ways to minimize time erosion . . . and we’ve incorporated them all into Turtle-Ops Profit Power.

But, most important is to take profits as soon as momentum wanes . . . as we did in the Semiconductor ETF example to your left.

Finding the optimum exit strategy took much more time and effort than any of us expected.

But finally, after five and a half intense months of testing, we had the perfect exit strategy . . . And as you can see, it was well worth the effort!

Of course, no trading system is 100%.

But, you can expect the average Turtle-Ops profit to be 3 times as big as the average loss . . . And that’s what’s important.

**Average Profit: 121%  Average Loss: 41%**

When the majority of your trades are winners . . . regardless of market direction . . .

And when your profits are 3 times bigger than your losses . . .

**Amazing things begin to happen!**

 Russell Sands’ experiences are not typical. Russell Sands is an experienced investor and your results will vary depending on risk tolerance, amount of risk capital utilized, size of trading position and other factors. Certain Subscribers may modify Russell Sands’ methods, or modify or ignore the rules or risk parameters, and any such actions are taken entirely at the Subscriber’s own election and for the Subscriber’s own risk. Please see hypothetical results disclaimer on page 2.
Imagine If YOU Could Grow $10,000 to $452,975 In the Next 21 Months!

Once we had a rock-solid exit strategy that gave us average profits 3 times greater than the average loss . . .

It was time to lay down some money management rules.

Sound money management plays a key role in the original Turtle Trading Strategy . . . It’s the foundation on which all trading success is built.

And money-management is central to Turtle-Ops Profit Power too . . .

**Rule #1:** Never invest more than 5% of your account into a single trade . . . Limiting trade size is the best way I know to avoid sabotaging emotions and devastating losses . . . Don’t ever break this rule!

**Rule #2:** Adjust the number of contracts so you’re always investing close to the same dollar amount into each trade. Consistent investment size leads to smooth steady growth.

**Rule #3:** Of course, the number of contracts you can buy with 5% of a fast growing account could soon get ridiculously large. So, I capped trade size at $5,000.

Why 21 Months???
Because That’s All The Proof You Need!

When I realized what a lifesaver Turtle-Ops Profit Power could be for millions of Baby Boomers concerned about their retirement . . .

I knew any delay in making it available would be as heartless as withholding experimental drugs from a terminally ill patient.

So, 21 months of testing was more than enough for me.

Russell Sands’ experiences are not typical. Russell Sands is an experienced investor and your results will vary depending on risk tolerance, amount of risk capital utilized, size of trading position and other factors. Certain Subscribers may modify Russell Sands’ methods, or modify or ignore the rules or risk parameters, and any such actions are taken entirely at the Subscriber’s own election and for the Subscriber’s own risk. Please see hypothetical results disclaimer on page 2.
Especially when I saw the way lazy, laidback Norm took to Turtle-Ops!

“It’s so darn easy, it’s virtually automatic!”

— Norm L., Palm Bch

“The way Russell’s got the rules all laid out, it’s so darn easy, it’s virtually automatic!”

“I used to rely on an FX robot to do my trading. Unfortunately, my broker closed their US office.”

“I’ll admit, I wasn’t looking forward to trading manually. But this is so cut-and-dry, and it takes so little time; I’m really having a lot of fun with it.”

“Truth is, trading nothing but currencies can get pretty boring. So it feels good to be looking at something else for a change.”

“On my very first trade, there was a Natural Gas ETF that was tanking. And I made a quick 127% on Put options.”

“Then I turned around and bought Calls for an ETF comprised of Brazilian Stocks and I made 142% profit in just 5 days.”

“You only need to look at the market for about 2 minutes once a day. But I find myself taking a peek now and again anyway; just to see what’s going on.”

“So yeah, I’m having fun. And I expect I’ll be making loads of money too!”

Now, how about you?

Who Else Is Ready To Have Lots of Fun and Make Loads of Money?

Turtle-Ops Profit Power is a finely tuned set of trading rules grounded in the profit secrets of the most revered trading system on the planet . . .

I’ve even included the original Turtle Trading Secrets . . . in its entirety . . . in the Turtle-Ops Profit Power guide book.

And, the book also gives you a list of ETFs that exhibit the strongest trends . . .

Testimonials are believed to be true based on the representations of the persons providing the testimonials, but facts stated in testimonials have not been independently audited or verified. Nor has there been any attempt to determine the experiences of the persons giving the testimonials after the testimonials were given. The average reader should not necessarily expect the same or similar results. Options involve risk and are not suitable for all investors. Past performance does not guarantee future results.
Trading Options Is How
The Little Guy Gets Rich

If right now you do nothing, nothing will happen. However, if you dare to pick up the phone today . . . the possibilities are endless!

“As a small trader, I started with $2,000 . . . and now I have $9,000” – Michael G., LA

“I made $3,000 in two days.” – Dinos A., WI

“I made on my very first trade over $30,000. Then on my second trade I made a little over $17,000. This year in the first 4 months, I’ve made a little over $70,000!!” – D.R., Florida

“One of my goals in life was to become a millionaire before I was thirty and retire. Well, I was a millionaire before I was twenty-five. On my thirtieth birthday, I walked off the floor [up] about $8-9 million.” – Tony Saliba

“In my first two years in the business, I had back-to-back 400 percent returns!” – Blair Hull, whose actual trading profits showed “every $100,000 produced gross trading profits of $1,370,000 in 51/2 years.”

“In the land of the blind, I was the guy with one eye.” – Joe Ritchie, whose closely-held company is estimated to have garnered close to $1 billion in trading profits.

A laid-off manager has made more than $371,000 in trading profits since being let go... or as he puts it, “Freed to make a fortune!” A 74-year-old retiree made over $1,000,000 in less than 30 days, without missing a single tennis match! A printer in Florida has made over $200,000 profit in 14 months . . .

Meanwhile, A Nantucket retiree has earned over $175,000 in 6 months... A laid-off construction worker is averaging $3,100 per week... a gym teacher is averaging more than $10,000 every month in his spare time... and Steve has over $55,000 profit in 11 months spending less than 2 hours per week.

the greatest momentum . . . and the least correlation to one another.

Which means at least one of these handpicked ETFs is always on the move!

If you want to trade plain ETFs, rather than options on ETFs . . .

My carefully selected list of ETFs, combined with the original Turtle Secrets . . . proven to be the greatest trend-following system of all times . . . is definitely for you.

And you’ll find everything you need to enjoy greater trading success than you ever imagined possible . . . explained in plain English with lots of pictures . . . within the Turtle-Ops Profit Power guide book.

But, please don’t stop there.

Because, your guide book also includes a simple, easy to follow introduction to options trading . . .

And it reveals the Turtle-Ops exit strategy that we spent 5½ months fine-tuning to option-trading perfection.

In fact, the Turtle-Ops exit strategy is so uniquely effective . . .

If you already trade options, you could probably boost your returns by simply incorporating the Turtle-Ops exit strategy into your current methodology!

Still, I doubt you’ll find anything to compare with the complete Turtle-Ops Profit Power System . . .
Turtle-Ops Profit Power 7 Big Advantages To Give You A 7-Figure Bank Account

1. **The Absolute Easiest Way to Trade.** Turtle-Ops buys Calls and Puts . . . and that’s it. There is nothing complicated about it. Options are listed securities with sellers making offers and buyers making bids, just like with stocks. You can trade options in an ordinary brokerage account, including your IRA . . . and you use all the same kind of orders . . . “at-the-market”, “limit”, and “stop”.

2. **Start with a Small Account.** The average investment for a Turtle-Ops trade is just $115 per option contract. So, if you want to start with a small account and turn it into a vast fortune, Turtle-Ops Profit Power is probably the best and surest way on the planet to do it!

3. **Spot Profit Opportunities Instantly.** Simply check to see if any of the ETFs on your Turtle-Ops Daily Forecast have crossed the tried-and-true original Turtle ‘line in the sand’ . . . If so, jump on the ‘money train’ and enjoy your ride. It’s so quick and easy, it takes only a moment to do.

4. **Make Money No Matter Which Way the Market Goes.** When the market’s going up, you’ll buy Call Options and watch your account soar. But the market doesn’t always go up . . . and the truth is, FEAR is 2½ times stronger than GREED as a motivator. So you’ll love how easy it is to exploit human nature for huge gains buying Put Options when the market’s in freefall.

5. **Capitalize on the Power of Leverage.** How would you like to put up just 1% of your own money, but keep 100% of the profits? That’s the power of leverage; and that’s the fastest way there is to accumulate extreme wealth. If an ETF goes up 10%, you can earn 100% profit on your money. And if an ETF soars 20%, 30% or $40%, you can become rich overnight!

6. **Enjoy Greater Safety.** When you buy a stock or an ETF you tie up several thousand dollars and just pray that the price goes up; if it doesn’t, you lose . . . in fact, one sucker-punch and you could lose your entire account. But if you follow the Turtle-Ops rules, your risk will always be small and strictly controlled so there’s no way you can ever suffer a big loss.

7. **Earn Consistently High Annual Returns.** Turtle-Ops Profit Power controls losses and allows profits to run . . . and that adds up to tremendous annual returns. Consider this conservative goal: Assuming an 8-week trade duration (Turtle-Ops average is less than half as long) . . . If your average winner is 100% (Turtle-Ops average is 121%) . . . and if your average loss is 50% (Turtle-Ops average is 42%) . . . even if you win only half the time (Turtle-Ops has won 6-out-of-10) . . . in 1 year $10,000 would grow to $47,683 . . . $181,899 in two years. You’ve already seen with your own eyes how Turtle-Ops Profit Power puts all the percentages in your favor to produce twice the growth, (including commissions).

So if you call today . . . a 7-figure bank account could soon be yours!

Call Now: 888-233-1431
Where strong trends . . . intense momentum . . . and profit-boosting leverage . . . work together to make you rich!

I’ll Even Hold Your Hand
For as Long As You Like!

Unlike Richard Dennis, who left us Turtles on our own . . . each of us responsible for managing $1,000,000 . . . after just two weeks . . .

I’m prepared to hold your hand indefinitely!

Every night, for as long as you like, I’ll send you a list of ETFs you should take a look at in the morning.

And, if the “Money Train” has left the station . . . as we discussed on page 8 . . . place your order and enjoy the ride!

Honesty, Turtle-Ops Profit Power is so simple you could easily trade on your own within two weeks, just as we Turtles did 30 years ago.

But, I think you’ll enjoy the way your Turtle-Ops Daily Forecast saves you time . . . keeps you motivated . . . and bolsters your confidence.

So, you’ll be happy to know I’ll continue sending you Turtle-Ops Daily Forecasts for as long as you like!

I’m not sure who came up with this crazy offer . . . But there are three ways for you to enjoy Turtle-Ops Profit Power.

And the preferred way . . . where you get the Turtle-Ops Guide Book for FREE . . . is definitely one heck of a Grand Coup!

Meet Russell Sands
Original Turtle Trader And Turtle-Ops Developer

“It seemed clear to me that if I were going to pursue the quest for the ingredients in trading success, I should be talking to the Turtles.”
— Jack D. Schwager, Author The New Market Wizards

Russell Sands is an interesting guy. He went to college on scholarships and now holds a MBA from NYU. He has a black belt in Karate. He won the World Championship Plimpton Cup for backgammon. And he’s been banned from nearly every major casino in the US for busting the bank with his blackjack strategy.

Even more impressive to traders: Russell Sands is an original Turtle and he has made millions trading futures the Turtle way.

What’s more, Sands is the only original Turtle to set up training programs to help aspiring CTAs, as well as private individuals, acquire the trading and money-management skills necessary to prosper as a trader. The way he figures it, share the wealth!

For commodities, Sands remains loyal to the original Turtle trading rules, which work as well today as they did when Richard Dennis used them to take $400 to $200,000,000. But, for trading options on ETFs, adjustments were necessary. And Sands made them!

Thirty years ago, Russell dared to give up his home and livelihood to participate in an exciting experiment that changed his life forever. Now, he’s extending a similar invitation to you, except the only thing you need to give up is your doubts.

Turtle-Ops is the next chapter to the greatest trading story ever told . . . and you’re invited to participate in this epic wealth-building adventure completely risk-free.

There’s only one way to find out how breathtakingly monumental the Turtle-Ops experience might be for you . . . and it’s really pretty simple.

Just put your doubts aside, pick up the phone, and call now . . .

The Turtle-Ops Profit Power guide book will be yours to keep and profit from forever!

**I Took a Chance – Now It’s YOUR Turn!**

Back in 1983 . . . on impulse . . . Richard Dennis and Bill Eckhardt made a crazy bet. And that led to the greatest trading story in history.

On a whim . . . I responded to their weird classified ad in the NY Times . . .

And, while I was thrilled to be chosen . . . I’ll admit, I had my doubts.

After all, we were FIRST . . . no one knew if we could be taught to pull millions, and ultimately billions of dollars out of the market.

To be honest, it all sounded too good to be true. But, out of curiosity as much as anything, I decided to give it a chance.

So I put my doubts aside . . . I accepted their offer . . . I paid attention for the 2-week training . . . I followed the rules . . . and before long I became hugely successful.

To this day, I’m still surprised and elated at the amount of money we original Turtles have made . . .

And at how much money some of my “2nd generation Turtles” . . . whom I’ve trained myself over the years . . . are making today.

Turtle Trading has changed many, many lives since 1983.
And because Turtle-Ops Profit Power puts immediate options profits within easy reach of traders everywhere . . .

I believe Turtle-Ops Profit Power could potentially outshine the original Turtle success many times over.

I Can Count You In . . . Can’t I?

In much the same way that Richard Dennis invited me to take part in the original Turtle experiment . . .

I’m inviting you to become part of ‘Operation Turtle-Ops Profit Power’.

Please, don’t over think it . . . Just say “Yes”!

I had to give up my job to participate in the original Turtle project.

You’re welcome to keep your job, if you want. “Operation Turtle-Ops” takes only a few minutes a day.

I had to move to Chicago to participate in the original Turtle project.

You can participate in “Operation Turtle-Ops” from the comfort of your own home.

I had to commit to 5 years of servitude to participate in the original Turtle project.

All I’m asking you to do is take a risk-free look and experience Turtle-Ops Profit Power for yourself.

Customer Survey Results

In a recent customer survey, we found that nearly three out of four customers that traded with our publication made money. Only 4% said they did not learn anything new and useful. See full survey results at www.tradewins.com/survey
If you like it, great . . . if you don’t, I’ll give you your money back.

You have nothing to lose and everything to gain.

Not only do you stand to become extremely wealthy, you could become famous too!

Call now . . . **1-888-233-1431**.

Sincerely,

Russell Sands

P.S. What if 30 years ago I had decided that giving up my job, moving to Chicago, and committing 5 years of my life was just too much to ask . . . And what if I had turned down Richard Dennis’ offer to teach me how I could exploit the market for millions and millions of dollars . . . But later, I learned how fabulously wealthy I would have been if I had just said “Yes”.

Can you imagine living your life with that kind of overwhelming regret?

---

**What if failing to pick up the phone right now were to become the biggest regret of your life . . .**

Why risk it? Call now:

**1-888-233-1431**

If not this, then what?
If not now, then when?

---

**Customer Survey Results**

In a recent customer survey, we found that nearly three out of four customers that traded with our publication made money. Only 4% said they did not learn anything new and useful. See full survey results at [www.tradewins.com/survey](http://www.tradewins.com/survey)
YES, count me in! Turtle-Ops Profit Power promises to be an even greater success story than the original Turtles . . . because Turtle-Ops makes it easy for traders of every level to use the most successful trading strategy in history in a regular stock trading account . . . with as little as $200. After seeing an average annual return of 311% demonstrated inside, I know this will be a truly epic wealth-building adventure of a lifetime for me, just as it was for the original Turtles. I can’t wait to get started!

I understand I have 90 days to decide if Turtle-Ops Profit Power is right for me. And if for some reason it’s not, I can receive a full refund of every penny I paid to participate . . . No questions asked (see page 23)
