Starting With Just \$269 You Could Be Rich In a Matter of Months!

Because Weekly Options have practically no "time value" they tend to be cheap, cheap, cheap. And that makes them perfect for small investors just starting out.

You could have purchased one option for each stock in the portfolio below for only \$269. And three days later you'd have \$494 in your account... which is fairly typical.

Important Details from the Account Statement below

Enter on Tues 2/14 - Exit Fri 2/17		Cost	Proceeds	Profit
HD	Home Depot, Inc.	31.00	50.00	61.21%
INTC	Intel Corp.	62.00	146.00	135.25%
MSFT	Microsoft Corporation	52.00	118.00	126.00%
WFC	Wells Fargo & Co.	62.00	105.00	69.29%
XLF	Financial Select Sector SPDR	62.00	75.00	21.03%
Totals	'	\$269.00	\$494.00	83.64%

Think what would happen if you compounded 84% return every week... **W.O.W.**!!!!

Starting with just \$4,600, I earned \$460,164 in 2 years using monthly options. Imagine what you could do with Weeklys...
