Of course, huge price swings spells awesome profit potential for RoboTrader™!

We didn't begin trading Crude Oil with real money until December 2010, just four months ago. But, as you can see, the \$9,200 per contract profit we made in that brief time took RoboTrader™ straight to the top.

And judging from our 5year back-test... I'd say there's a good chance we could be staying on top, wouldn't you?

Look at the simulation below. Aren't you amazed by how smoothly RoboTrader™ was able to exploit every twist and turn in the volatile oil market... 101 trades; 52 long and 49 short... 1,590% in 5 years!

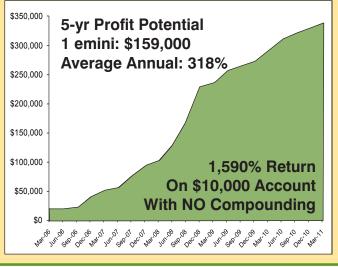

Light Crude Oil (CL) is a futures contract for 1,000 barrels... Margin requirement: \$6,800*. So, to be on the safe side, you'd probably want a \$15,000 - \$20,000 account to trade full-size contracts.

But starting smaller is no problem at all... simply trade the emini.

Emini Crude Oil (QM) is half the size... 500 barrels, \$3,400 margin... and an excellent alternative.

Start big, or start small... the important thing is that you start NOW. The rising price of oil is in the news once again. Why spend your time bemoaning the price of gas at the pumps when you could possibly be profiting with every tick up... call now: 888-233-1431.

Light Crude Oil emini \$10,000 Grew to \$169,000 In Hypothetical Results

^{*}Margin requirements vary over time. Please check current requirements.
